

The progression of the experiment is as follows:

1. **Information Window:** An Information window informing about the psychophysiological scales which will be used to record participant responses.
2. **MCQ:** an MCQ containing 11 very simple emotion scenarios as a formal practice session about scales.
3. **Stimulus Window:**
 - a. Stimulus window with video (loaded automatically). Video will play for 1 minute.
 - b. A CLICK FOR YOUR EMOTION: During the video play when you feel emotion please click anywhere on the player so that time can be recorded.(Please take a time gap of 5 seconds for the next click. That means don't click for same scene again and again)
 - c. If video is not being loaded please check java plugin.
4. **Response Window:**
 - a. Participant has to register their response on the following scales: Valence, Arousal, Dominance, Liking, Familiarity and Relevance.
 - b. At last a drop down enlisting emotions based on your mark on valence and arousal scale is displayed. Participant has to select their respective emotional feeling they felt while watching the videos
 - c. At any point if you are feeling confused please click on "Scale Information" button to open the instruction window on separate browser window.
5. **E-Certificate:**
 - a. Once at least 10 videos have been rated you'll have an option for final submission or continue voluntarily to look at more stimulation and register your response.
 - b. After 10 videos you can quit at any time.
 - c. Upon submission, you will be navigated to a google form containing some entries and consent (if anybody doesn't want his/her data publicly available).
 - d. As soon as the google form is submitted a certificate will be issued to the email-id you have entered.
6. **Thanks for your cooperation.**
